

## PROFESSIONAL SUMMARY

- Software Engineer with 2.5 years of full-stack development experience, adept in JavaScript, Node.js, ReactJS, Java, Spring Boot, and REST APIs.
- Proven ability to deliver high-quality projects efficiently across the stack with strong problem-solving skills.

## EDUCATION

<b>B.Tech</b> : National Institute of Technology Trichy (NIT Trichy)	<b>CGPA: 7.67</b>
<b>12th Class</b> : Narayana Junior College - Vijayawada	<b>95.1%</b>
<b>10th Class</b> : MP & EV English Medium School - Visakhapatnam	<b>CGPA: 9.8</b>

## SKILLS

**Programming Languages:** Java, C, C++, JavaScript  
**Front-End:** ReactJS, Redux, HTML, CSS  
**Back-End:** Node.js, Express.js, SpringBoot, REST  
**Databases:** PostgreSQL, MySQL, Redis, Firebase  
**Tools:** Git, Docker, Kubernetes, VSCode, Eclipse, IntelliJ, SonarQube

## WORK EXPERIENCE

**Brane Enterprises, Hyderabad, India - Software Engineer** (Jan 2024 - Present)

**Tech Stack:** ReactJS, Redux, Java, SpringBoot, RabbitMQ, PostgreSQL, Docker, Material UI

- **Talent Scout**
  - Developed the Talent Scout Recruiter Assistance Application, integrating with LinkedIn API to enhance candidate search and management, resulting in a 35% reduction in candidate sourcing time.
  - Implemented search filters, improving candidate sourcing efficiency by 40%.
  - Integrated API for contact information retrieval with a credit management system.
  - Enabled candidate collection management with exportable CSV data, streamlining recruitment workflows and reducing manual data processing by 25%.

**Capgemini Engineering, Hyderabad, India - Software Engineer** (Jun 2022 - Dec 2023)

**Tech Stack:** ReactJS, Redux, Node.js, Java, SpringBoot, PostgreSQL, Redis, RabbitMQ, JWT, Docker

- **Smart Healthcare Management System**
  - Enhanced patient care through appointment scheduling, record management, and real-time doctor-patient interactions.
  - Integrated secure JWT-based user authentication and real-time notifications for improved engagement.
  - Developed an insurance claims module for document submission, enhancing claims processing with insurance providers.
- **MSC International Freight Management System**
  - Built a freight management system supporting container booking and route-based vessel suggestions.
  - Implemented real-time cargo movement notifications and JWT-based access security.

## PERSONAL PROJECTS

- **Real-Time Chat Application**
  - Developed a real-time chat application with user signup, login, and one-on-one messaging.
- **Portfolio Website**
  - Built a personal portfolio website using React.js and Email.js, featuring a contact form for direct inquiries.
- **Document Management System**
  - Created a system to securely store, retrieve, and manage documents, with access control and version tracking.
